ourstory

It started with a simple bonfire in the heart of the Australian continent, under the red Ayers Rock. Two tourists, Alfred Weilandt and Jerry Dabrowski were sitting by the fire, long into the night, listening to Aboriginal tales about a mythical Epoch of Dreams. The atmosphere created by the flames inspired the two to find an easy way to have the same fire in contemporary interiors.

They intended to overcome the existing difficulties in the form of soot, ash and the need for a chimney, all of which are associated with fire in an interior space. Contemporary lifestyle demands products that through design have a character of their own but are safe and easy to use. After months spent on designing and testing, they came up with a product combining the beauty of form and the comfort of use thanks to bioethanol fuel. But most of all a product that satisfies the atavistic need to commune with fire.

designfire

We took on the challenging task and went beyond all the established boundaries to design fire like never before. Our endeavours lead us to develop solutions that allow us to arrange a natural fire in any space; be it indoor or outdoor.

As a world leader in fully automatic fireplaces, we guarantee the convenience and safety of our products. We listen to our clients carefully to provide individually customized products. Our offer covers net zero bioethanol fireplaces with patented BEV® Technology and gas fire solutions that provide a lot of freedom in designing your perfect space with fire as the focal point.

The recognition says it all. Planika is global. With an extensive distribution network, we are present in over 100 countries around the world. But the success also lies in the concept of a teal organization that Planika adopted. In our company, there is no hierarchy. All the employees are given freedom in managing their working schedule and have a real influence in the process of product creation.

~This made it possible to give you truly unique solutions in fire design.

Planika

NETZERO™

REAL FIRE WITH NO HARMFUL SUBSTANCES

Planika developed a cutting-edge solution based on the combustion of ethanol vapors. The real Net Zero™ fireplaces of the future. The combustion is clean; no ash, soot or other harmful substances are produced, so there is no need for a chimney or other hard connections.

HOW DOES A NET ZERO™ FIREPLACE WORK?

The net zero fireplace burner incorporates an automatic BEV® (Burning Ethanol Vapours) technology. The vapour generator changes liquid ethanol into gas and the microprocessor controls the amount of released alcohol. The combustion is clean as it takes place just above the burner where it has full access to oxygen. No other technology can ensure safe and ecological fire.

HOW IS THE NET ZERO TECHNOLOGY CO₂ NEUTRAL?

Planika's eco fireplaces utilize bioethanol, an organic eco fuel made from plants, such as corn, wheat or potatoes. Ethanol is known to produce lower carbon dioxide emissions and is a particulate-free burning fuel source.

The Net Zero™ Technology heats up the eco fuel, creating ethanol vapours which are then combusted. The entire process is under full control of the Net Zero™ fireplaces. While combusted, the alcohol emits carbon dioxide that is then entirely absorbed by plants in photosynthesis. This way, the process comes full circle. 100% of the emissions are compensated by the plants that absorb CO₂. Thanks to this, burning ethanol vapours don't contribute to global warming.

THE UPCOMING CHANGES

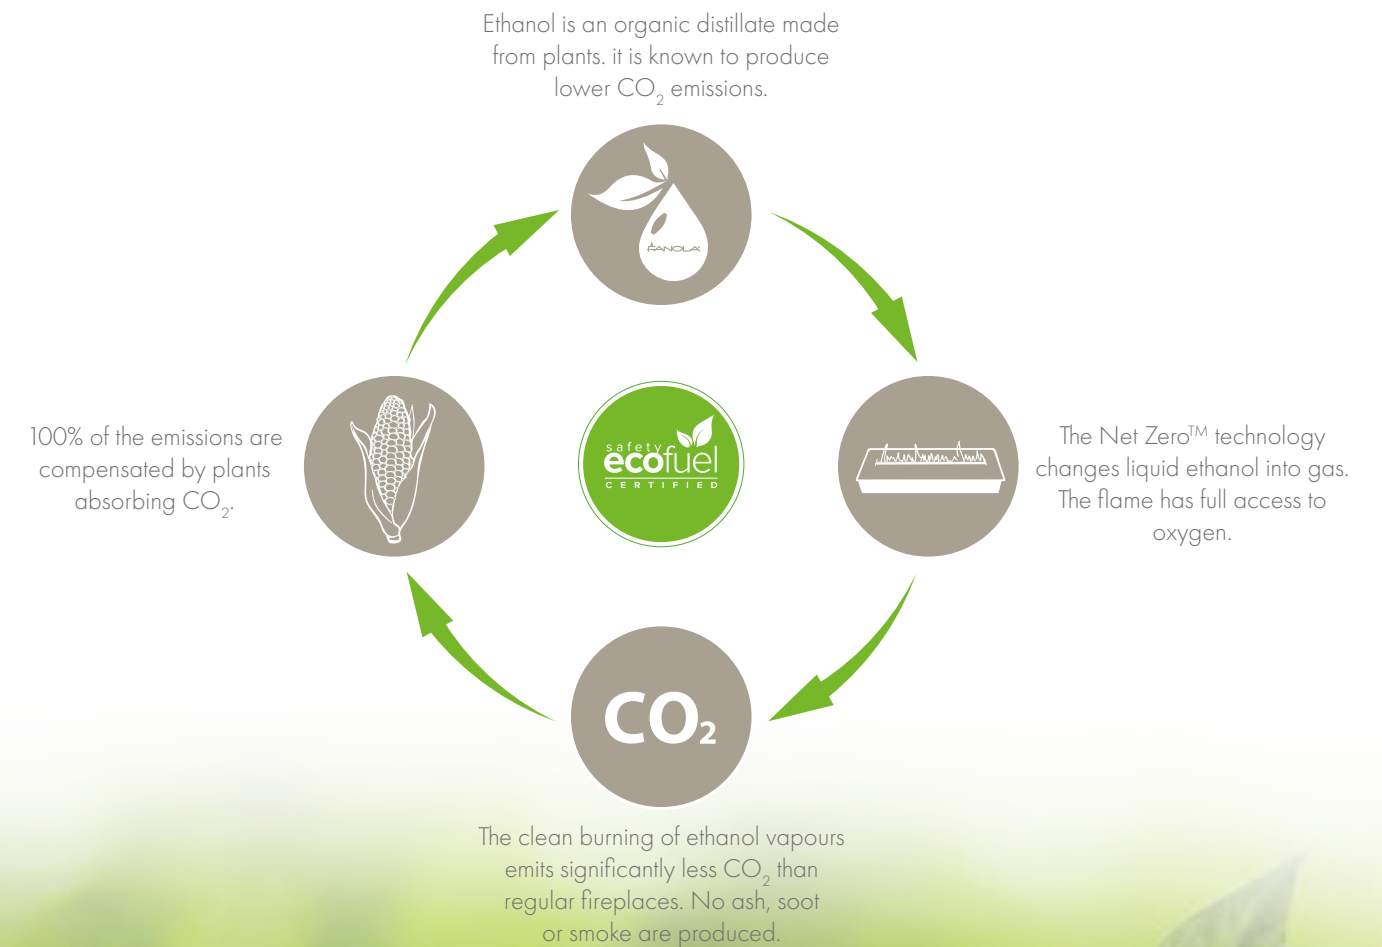

The increasing CO₂ emission forced the global transformation of heating systems. This includes anti-smog restrictions and a total ban on using fossil fuels for heating. The world's biggest cities are introducing measures to fight air pollution. London became a smoke control zone, which means the residents are not allowed to use wood and coal for heating. Subsequently, New Zealand is going to pass a ban on new residential gas connections, making fossil fuel devices illegal. Other cities like Montreal and San Francisco took the same path and made wood-burning prohibited. Following all these changes, Planika created Net Zero™ fireplaces that are safe for the environment and meet strict emission standards.

PLANIKA CARBON NEUTRAL FIREPLACE – ECOLOGICAL FIREPLACE OF THE FUTURE

Planika offers a wide selection of Net Zero™ fireplaces that utilize patented BEV® Technology which eliminates direct contact between the fuel and the fire. Our ecological fireplaces produce clean and efficient fire with no soot, smoke or ash. Thus, Planika Net Zero™ fireplaces are the cleanest available on the market heating solutions. Check the range of our bioethanol ecological fireplaces.

biofuel for fireplace

renewable energy source

AUTOMATIC ETHANOL FIREPLACES

YOUR SAFETY COMES FIRST

Thanks to the development of ethanol fireplaces, we can now enjoy real fire even in apartments without ventilation systems. When bio-ethanol fireplaces were first introduced to the market, only manual devices were available. These weren't much more than metal containers filled up manually with bio-ethanol and ignited with a lighter. The construction used little to no technology and posed serious threats of spillage or fire explosion.

■ DRAWBACKS OF MANUAL BIO-ETHANOL FIREPLACES

The manual bio-ethanol fireplaces soon gained a bad reputation for being too dangerous. The fuel residues, which still burn at the bottom of the fireplace, produce a flame that is practically invisible to the human eye. The majority of accidents happen when the fuel is added to, what might seem to be, an extinguished fireplace, causing sudden blasts of fire and burns.

■ THE AUTOMATIC FIRE

Thanks to technological advancement and the introduction of automatic bio-ethanol fireplaces, we are no longer limited to unsafe manual devices.

The automatic BEV[®] technology means that there is no direct contact between the fire and the fuel. The ethanol is contained in a separate reservoir inside the fireplace from where it is transported into the vapour accelerator. Warm ethanol evaporates through a perforated burner and is ignited by a filament. The burning process takes place above the burner and provides the flame with unlimited access to the oxygen making it fully combusted. This prevents the creation of a smell which smell typical for manual bio-ethanol fireplaces. The BEV[®] technology can rapidly extinguish the flame by closing the vapour release.

Planika introduced electronic remote controllers, developed apps and integrated Smart Home System module to give you full control over the fireplace from the comfort of your sofa.

Another benefit is a pump that delivers the necessary amount of bio-ethanol and automatically stops the filling process when the reservoir is full. Such a feature guarantees that you will never spill the fuel again! Also, the system won't add fuel when the fireplace is still working or cooling.

■ BUT IS IT AUTOMATIC?

Some bio-ethanol fireplaces are incorrectly considered to be automatic since most of them are not much different from the manual ones. Adding a spark ignitor or a peristaltic pump does not automate the combustion process. Once warmed up, these fireplaces pose the same threats as the manual bio-ethanol fireplaces. To distinguish between those two types, remember that the true automatic fireplace produces flames by burning ethanol vapours.

■ AUTOMATIC FIRE OPENS NEW POSSIBILITIES

Although the automatic BEV[®] fire is a relatively new invention, it has already become popular amongst architects and interior designers. If you consider buying a fireplace and don't want to modify your house or apartment, the automatic BEV[™] bio-ethanol fireplace seems to be the only option that meets even the most demanding safety requirements.

■ KEY DIFFERENCES BETWEEN MANUAL AND AUTOMATIC BEV[®] DEVICES

Non-automatic fireplaces consist of a metal container that is manually filled with bio-ethanol and ignited with a lighter. The construction is extremely simple and poses some serious threats, such as fuel spillage, burns and fire explosions.

- Manual**
- ✗ Noticeable odour
 - ✗ Visible smoke
 - ✗ Hot burning fuel
 - ✗ Risk of spillage
 - ✗ Burns hazard

- Automatic BEV[®]**
- ✓ Automatic fuel pump
 - ✓ Smart Home System
 - ✓ No smell, smoke, ash
 - ✓ Fuel stays cool
 - ✓ Control flame height

Automatic BEV[®] technology guarantees a complete separation of the fuel tank and the fire. This, coupled with multiple sensors, meets even the most robust safety requirements.

AUTOMATIC

ETHANOL FIRES

FLA3 BURNER

AUTOMATIC ETHANOL BURNER (Net Zero fireplace with BEV Technology®)

FEATURES

- Automatic refilling system
- Remote control
- Wi-Fi
- 6 levels of flame
- Safety sensors
- Custom length
- Top finish:
 - Black powder coating (standard)
 - Stainless steel (optional)
 - RAL colour (optional)

OPTIONAL ACCESSORIES

FIRST OF ITS KIND FIREPLACE ON A YACHT

PANORAMA FIREPLACE

AUTOMATIC ETHANOL FIREPLACE (Net Zero fireplace with BEV Technology®)

FEATURES

- Automatic refilling system
- External control panel
- Remote control
- Wi-Fi
- 6 levels of flame
- Safety sensors
- Glass enclosed
- Glass foam granulate included
- Finish: black powder coating

OPTIONAL ACCESSORIES

ARRANGEMENT OPTIONS

PANORAMA	
	BURNER 990 mm
	max. 7.0 kW
	5.5 L
	max. 10.0 h
	min. 70 m³

ELECTRIC FIREPLACES

ASTRO FIREPLACE

ELECTRIC FIREPLACE

REFLEX TECHNOLOGY

a system of prisms and LED lights that provides more visual depth than a regular 2-dimensional fireplace. The warm-coloured mirror installed on the back wall enlarges the flame giving you a more natural experience.

CONTROL OPTIONS

INCLUDED INCLUDED

YOU DESIGN!

Enjoy the three-sided panoramic flame or cover the sides of Astro with the included panels. By framing the fire you get three additional arrangement options.

HEATFLOW SYSTEM

Astro not only decorates but also warms up your home. Take advantage of the 2-stage heater to enjoy cosy winter evenings.

MULTIZONE COLORFLOW

The Multizone Colorflow let's you give Astro your own look. There are three lighting zones, each with individual colour settings.

OPTIONAL ACCESSORIES

DETACHABLE SIDE PANELS (INCLUDED IN SET)

SINGLE-SIDED LEFT CORNER RIGHT CORNER THREE-SIDED

INSTALLATION OPTIONS
